Mr. James W. Yount  
Senior Environmental Engineer  
Weyerhaeuser Longview Pulp and Paper Mill  
3401 Industrial Way  
Longview, Washington 98632

Dear Mr. Yount:

In order to be in compliance with Chapter 90.56 RCW the following items were necessary to be completed by July 15, 2001. I have received your letter requesting a submittal extension. As we discussed previously by phone, Washington State Department of Ecology will approve Weyerhaeuser's extension until August 17, 2001. Please complete and submit the revisions listed below by August 17, 2001.

1. Weyerhaeuser must submit for approval, plan amendments detailing the process of the management system they used during the spill drill. Weyerhaeuser may reference the process found in the Northwest Area Contingency Plan and the 2000 FOG.
2. Weyerhaeuser must submit for approval plan amendments detailing the job descriptions for all response positions within the contingency plan. Weyerhaeuser may reference the job descriptions found in the Northwest Area Contingency Plan and the 2000 FOG.
3. After Ecology reviews and approves the process and job descriptions submitted by Weyerhaeuser, Weyerhaeuser must provide training to all Spill Management Team staff to ensure competency.
4. Weyerhaeuser must update all the organization charts and organization lists found in the contingency plan. Several staff are no longer on the team, and must be removed from the contingency plan. Weyerhaeuser must include primary and alternative team members down to the unit level in the plan.
